

# A GUIDE TO EXPLORING OCEAN PLASTICS

## Bringing Galapagos into your home: A home learning resource from Galapagos Conservation Trust

Our Exploring Ocean Plastics resources are an exciting set of activities that have been designed for you to do with your child at home. The following points provide some detail to help you gain the most from the activity sessions:

Activities designed are for students between 7-11 years, with guidance from an adult.

There are six activity sessions with resource materials provided. They follow a logical progression, although you can choose to do as many or as few as you like.

Each session has a detailed plan to guide you step by step through the activity, with suggestions for further exploration if you want to keep going.

We recommend reading through activity notes first.

A glossary is provided at the end to help with some of those tricky words.

We would love to hear your responses, ideas, or questions, so please do email us at [projects@gct.org](mailto:projects@gct.org)
